SPA supplements are NOT required for the ahhNatural system to work in most hot tubs. However, they are nice to have around when you need them.

We stress that supplements are for FIRST AID for heavier bather loads, kids or vacations. Your need for supplements always depends on your hot tub, your water source and what you allow to enter into your hot tub.

## How to use spa supplements with ahhNatural.

Add one supplement at a time, Always run jets one cycle to mix the supplement through the water. Allowing max circulation with your cover up for 20-30 adds minutes to the effectiveness of all supplements.

**ahh-some Jet and plumbing cleaner** - A deep Detox for every hot tub. Removes bio-film that naturally causes build-up and traps old chemicals to PVC pipes, deep cleans NEW TUBS of manufacturing debris and test water ick. allows you to the DETOX section of the ahh 1-year kit instructions and STEP 4. Strictly follow the dose instructions on the jar. If lots of dirt and debris emerge or if it smells, add 1/2 C per 100 gallons of household bleach to 'kill bacteria' Let sit overnight. Run jets for 30 min. before you drain the water the next day.

**Clean & Perfect by Natural Chemistry** - Uses a botanical enzyme technology. The perfect all purpose cleaner and a great pool and spa cover cleaner. Removes the toughest stains and odors gently and completely from any hard surface or fabric. Follow bottle directions.

**Spa Perfect- by Natural Chemistry** uses natural enzymes to eat up body oils, helps prevent the build up of organic waste within your system. Used as a preventative maintenance tool or when you don't want to insist on pre showering before bathing- recommend using 1 Capful every 3-4 weeks and when you see any oil on the water surface \*Fight the urge to overuse this product, less really is more. Spa Perfect as a filter cleaner: When using with ahhNatural you can alternate using a peroxide bath. Add 1- capful of SPA PERFECT per 5-gallon bucket of warm water. Let soak for 2-3 hours. Rinse. Spa Filters should be routinely rinsed and treated every 2 to 4 weeks depending on use. THIS IS MORE ECO Sensitive way clean filters.

**PRO-TIP:** Deep clean every other month with Spa perfect after decontaminating with peroxide will remove deep-set body oil and dirt making filtration more efficient.

**Sea Klear non-chlorine shock (MPS):** Used for faster recovery of cloudy water, mild odor, etc (and/or during the cleaning process before installation, to remove build up in pipes). Remove ahhNatural bag from spa, follow instructions on the bottle and run jets for 1 cycle, replace the bag. \* do not use with spa perfect, this product eats the natural enzymes of spaperfect and defeats it's the purpose. You may use this product before and after heavier tub use to help your water recover faster. Allow 1 day before using other treatments.

**SeaKlear natural clarifier:** For emergencies only! Use if the water is chronically cloudy and the shock did not take care of this... this process can be messy so be sure to clean your filters after use. Clean filters before and after application. Use 6-10X the indicated amount and run jets for 2-6 hrs best results \*Do Not use the natural clarifier and non-chlorine shock at the same time. Wait 1 day after non-chlorine shock before using natural clarifier. (remove ahh bag during this process) You must hose off debris within 48 hrs of use to avoid re-releasing into your water.

**SeaKlear - Filter spray:** A highly concentrated deep cleaning spray that removes deep-set oils, grease and scum spa filters. Power hose off any topical debris from filters.
